FAVERSHAM BOROUGH COUNCIL

Municipal Offices, Faversham, Kent.

To the Chairman and Members of the Council.

Mr. Chairman and Gentlemen,

This is the first Annual Report since my appointment in October 1971.

The health of the district continues to be satisfactory and there has been little change in the statistics as will be seen from the figures in the Report.

The incidence of the various infectious diseases is considerably less than it was some years ago. Diptheria has not been notified for some years. A considerable number of cases of Scarlet Fever are reported but this is now a relatively mild disease. Measles continues to appear showing a peak rise in alternate years. Immunisation against this disease is being carried out by the County Council Medical Officers and the incidence of Measles should gradually reduce in the future as more children are immunised against it. Considerably fewer cases of Whooping Cough and Tuberculosis are being notified.

Schoolgirls are now being given protection against Rubella (German Measles). For children this is usually a mild disease, but if a woman becomes infected with Rubella during pregnancy then the disease can have a serious effect upon the health of the baby. It is therefore advisable for girls to obtain protection against this disease to lessen the chances of being infected with Rubella in later life.

A few cases of Typhoid and Dysentery occur in this country among travellers returning from holiday abroad, where the standards of hygiene are not always as high as they are in this country, especially in rural districts. Fresh fruit exposed on open stalls is liable to contamination by flies and insects and should be well washed before eating. If the water supply is not chlorinated it should be boiled before drinking. Immunisation against Typhoid will give protection if carried out some weeks before going abroad. If on return from a holiday abroad symptoms of diarrhoea occur, then it is advisable that a doctor should be consulted to eliminate possible infection with Typhoid.

I would like to thank the staff of the Health Department for their loyal support and efficiency in maintaining a high standard in the Department.

I appreciate the interest and help of the Health Committee during the past year.

I am,

Your obediant Servant.

G.R. THORPE

Medical Officer of Health

SECTION 1

STATISTICAL AND SOCIAL CONDITIONS OF THE AREA

CLIMATOLOGY

The total rainfall during the year was 23.10 inches as compared with 24.6 inches in 1970 and 27.23 inches in 1969.

Maximum and minimum temperatures, together with the rainfall recorded each month, are shown in Appendix "A".

AREA

The Borough of Faversham covers an area of 3,070 acres, and includes the villages of Davington and Preston.

POPULATION

The Registrar General estimated the mid-year population for 1971 as 14,830, an increase of 120 from the estimated population for the previous year, i.e. 14,710.

NUMBER OF INHABITATED HOUSES

The number of inhabitated houses and flats at the end of 1971 was 5627 as compared with 5592 at the end of 1970. Towards this increase 8 flats were provided by the Council, and 36 houses were constructed privately. During the year 9 were demolished. The net increase in habitated houses and flats was therefore 35.

RATEABLE VALUE

£605,184 compared with £597,278 at the 31st December, 1970.

SUM REPRESENTED BY THE PENNY RATE

£5757.06 for the financial year 1971/72.

SECTION IV

GENERAL PROVISION OF HEALTH SERVICES

NATIONAL HEALTH SERVICES

Clinics and Sessions

Local Authority Health Services under the National Health Service Act are provided and administered by the Kent County Council. These services include the Care of Mothers and Young Children, the provision of Midwives, Health Visiting and Home Nursing, Vaccination and Immunisation Prevention of Illness, Care and After-care, and Domestic Health Services.

Chest Clinics and the care of Tuberculosis patients are the responsibility of the Regional Hospital Board, as also is Mental Welfare.

Various Clinics in connection with these Services are held as follows:-

(a)	Queen's Hall	<u>Day</u>	Time
	Child Welfare	Tuesday and Friday	2 - 4 p.m.
	(Immunisation and Vaccivelfare Clinic on Tues	ination are carried out sday and Friday afterno	
(b)	School Clinic Soloman's Lane		
	Ante-Natal Clinic Relaxation and Mothercraft classes		2 - 4 p.m 10 - 12 noon.
Min	or Ailment Clinic		
		.Tuesday	3.30 - 4.30 p.m. 10.30 12 ncon 1.30 4 p.m.
			9.30. – 12 noon 1.30 – 4 p.m.

Chest Clinic

Cases for X-ray are referred to Canterbury Chest Clinic as and when required.

(d) Domestic Help

Application can be made at the Kent County Welfare Office at 44 East Street, Faversham - Monday to Friday.

(e) Psychiatric Clinic

This Clinic is held every Thursday at 5 p.m. at 13 South Road. Appointments are made through St. Augustine's Hospital.

School health

Based on the report of the Principal School Medical Officer for the year 1971.

The following is a summary of the returns for the above year for the area comprising of the Boroughs of Faversham and Queenborough in Sheppey, the Urban District of Sittingbourne and Milton Regis and the Rural District of Swale.

TABLE XII

Routine School Medical Inspections							
	Physical	Physical Condition of Pupils Inspected

SECTION V

REMOVAL OF AGED PERSONS

National Assistance Act, 1948
Section 47
National Assistance (Amended) Act, 1951

No aged person was removed under the provisions of the above Acts during 1971.

SECTION VI

Sanitary Circumstances of the Area

Staff

There were several staff changes during 1971. In April Miss Bodley, part-time clark, resigned and Miss Cook was appointed to the vacant position in May.

As no replacement was obtainable for Mr. Longley, Additional Public Health Inspector, who had resigned in May 1970 the Department staffing was re-assessed as a result of which Mr. S.E. Kennett was appointed as a Technical Assistance, and commenced his duties in May.

The vacant post of part-time Rodent Operator was also changed to a full-time Rodent Operator and Mr. A. Underwood was appointed to this post in August.

Water Supply

Mains water supply to the Borough is provided by the Mid Kent Water Company. The Divisional Office is now at Canterbury, but the local office remains at 41 Stone Street.

During the year the following extensions to the mains were carried out:-

611	411	3"	Total Yardage
457	637	234	1,328

The following samples were taken in the Borough during the course of the year:-

	Bact.	Chem.
From consumers taps within the area	24	4
From pumping stations supplying the area		
Raw	102	9
Treated	52	3

The samples were satisfactory in all cases except three bacteriological from Copton Pumping Station. The treated water going into the supply from this source was satisfactory at all times.

Drainage and Sewerage

The modernisation scheme for the sewage works commenced in February and it is anticipated that the work will be completed early in 1973.

A short extension to the sewerage system was laid to take some houses in Brogdale Road and Ospringe Place. These premises had previously been connected to cesspools.

Refuse Collection and Disposal

During 1971 a further 600 houses were brought into the paper sack system of refuse collection.

Substantial work was carried out to improve the public amenity tip which is situated on the Care Road side of the Councils refuse tip.

The Borough refuse continued to be tipped into the disused gravel workings along the Oare Road.

Public Conveniences

The public conveniences within the Borough are maintained and supervised by the Borough Engineers Department. The main accommodation which is in the Central Car Park has a full-time attendant.

Public Swimming Bath

During the 1971 season 52,414 people paid for admission to the pool as compared with 69,789 in 1970. 406 season and weekly tickets were issued as compared with 527 in 1970. 8,869 spectators paid for admission - 11,169 in 1970.

The reason for the reduction in the use of the pool during 1971 is attributed to adverse weather conditions which prevailed during the months when the pool was in use.

Mortuary Accommodation

Mortuary facilities are provided at the Faversham Cottage Hospital.

SECTION VII

Inspection and Supervision of Food

Milk

There are no dairies in the area, but two new "distributors" were registered during the year.

Ice Cream

Forty-eight premises are now registered for the sale of ice cream, a decrease of one as compared with 1970.

Bakehouses

The four bakehouses continued in use during the year; no complaints about the products from these premises were received.

Market Stalls

The number of stalls using the market place on Fridays and Saturdays varied throughout the year but mainly consisted of one regular user on Fridays and four on Saturdays.

Special stalls with coloured awning have been provided by the Council.

Container Traffic

With the introduction of the new port health control system whereby the sealed containers being used for the importing of food products can be routed to their destination without inspection has meant inland inspectors are having to deal with this duty.

In Faversham 128 containers were inspected during 1971 and it is thought likely that the throughput will increase with the present decrease of overland rail container traffic.

Export Certification

During the year forty-four certificates were signed to cover the export of various food products from one of the local food factories. The exports were mainly meat pies to Canada.

Shellfish

Following complaints inspections were made at a house where it was found that shellfish were being cooked. The person responsible was prosecuted for cooking shellfish at unregistered premises and the Court imposed a fine of £1C.

TABLE XVIII

FOOD AND DRUGS ACT, 1955

The following details of samples taken in the District under the Food and Drugs Act, 1955 are supplied by courtesy of the Chief Inspector Weights and Measures Department, Kent County Council.

factory factor	
Milk 11 -	
Butter, margarine, lard, cooking fats, cheese (including processed cheese) 2	
Tinned meats, meat, fish, fish and meat pastes 2 3 Sugar, sugar confectionary, flour,	
confectionary, chocolate products, cereals 4 9	
Tea, coffee, cocoa, beverages, minerals, cordials 1 Jams, preserves, honey, jellies	
Dried fruit, raw fruit, vegetables, tinned fruit and vegetables	
Pickles, sauces, vinegar, condiments 5	
Drugs, medicines 5 Becr, wines, spirits 8	
Liscellaneous 4 2	
50 16	

UNSATISFACTORY SAMPLES

Mixture of Scotch Broth and Steak in Gravy

Contained a piece of metal cutting blade. Both manufacturers contacted, but no further action as origin of object could not be established.

Bacon Pieces

The bacon had adherent soiling consisting of wood, rust, sacking and general debris. Retailer cautioned.

Bacon

Small portion tasted sour. Packer advised.

Spaghetti with Tomato and Cheese sauce

Ratio of sauce to spaghetti excessive. Manufacturer cautioned.

Porage Oats (2 samples)

Contained three live saw-toothed beetles. Further sample contained thirty similar beetles. Retailer cautioned and remainder of stock destroyed.

Unsatisfactory Samples continued

Bread

Soiled with iron and mineral oil. Bakery cautioned.

Loaf of Bread

Affected by mould. Retailer and bakery cautioned.

Loaf of Bread

Affected by mould. Bakery cautioned.

Loaf of Bread

Affected by mould growths. Retailer and bakery cautioned.

Brown Bread

Affected by mould growths. Retailer cautioned.

Loaf of Bread

Embedded in crumb of bread was a wasp. Bakery cautioned.

Shredded Marmalade

Surface affected by mould growths. Manufacturer cautioned.

Tometo Soup

Contained mass of tin sealing compound. Manufacturer advised.

Shredded Beef Suet

On the 15th September, 1971 at Faversham Magistrate's Court Bertram Horace Stewart of 16 Athelstan Road, Faversham, pleaded guilty to selling shredded beef suct extensively affected by mould growths contrary to Section 2 of the Food and Drugs Act,1955. Fined £20 with £3 Advocate's Fee. Total £23.

Chips

Contained parts of a blue-bottle. Retailer cautioned.

UNSOUND FOOD

The various foodstuffs condemned or surrendered as unfit for human consumption during the year were as follows:-

FRUIT	14 bulk bins New Zealand Apples 120 cartons " " " 3,900 lbs. " " " 3 bulk bins Australian " 250 kilos Spanish Melons
VEGETABLES	3 crates Mexican Tomatoes 249 cartons " " 588 cartons Dutch Cucumbers 82 trays Beans (20 packs per tray)
FISH AND MEAT	16 lbs. Boneless Silverside 10 lbs. Irish Sirloin and Rump 108/4 lbs. Australian Boneless Mutton 17 lbs. Irish Silverside 6 lbs. Gurnet 1 stone Herrings
MISCFILANEOUS	412 packets various foodstuffs 718 tins " " 7680 jans " "

SECTION VIII

General Public Health Works

Infectious Diseases

The reported cases of infectious diseases were 248 in 1971, this being an increase of 217 over the 1970 figure of 31. The increase is accounted for by the increase of Measles to 234 cases this year.

8 visits were made to make enquiries and to give advice on control.

46 members of the Council's Staff were vaccinated by the Medical Officer of Health against influenza.

Offensive Trades

The two bone boiling and one hoof and horn cooking factories continued to operate at the beginning of the year. Later the hoof and horn factory ceased production and it is not thought likely that the factory will re-open, mainly because of the difficulty in obtaining supplies of raw material.

121 complaints, referring to 55 particular days, were received from members of the public about offensive smells in the Care area. Details of this difficulty, and action taken, are set out in a report, Appendix C, which was submitted to the Council in January 1972.

Licenced Premises

21 inspections were made of licenced premises but only minor matters were found to need attention.

Petroleum

All the premises at which petroleum or petroleum products are stored were inspected before licences were renewed. These inspections were carried out in conjunction with the Fire Prevention Officer of the Fire Brigade. 28 notices were served for contraventions of the "Conditions of Licence" as imposed by this Authority.

Explosives

8 visits were made to premises where fireworks were being sold, all the storage facilities provided were satisfactory.

2 visits were made in co-operation with the Police Authorities to premises where explosives are stored.

Pet Animal Act, 1951

2 premises are licenced in the Borough for the purposes of keeping pet animals for sale.

OFFICES SHOPS AND RAILWAY PREMISES ACT, 1963

The following table indicates the overall position of premises which are at present registered in the Borough.

TABLE XIX

	Promises Reg. during year	Total Reg.at cnd of year	No. receiving general insp.	No. of persons employed

Total	2	170	58	871
		TOTAL	MALES	3 52
		TOTAL	FEMALES	519

In all some 73 visits were made to registered premises for the purpose of enforcing the provisions of the Act.

Owners and occupiers have again responded in an encouraging way to notices requiring work to be carried out.

RODENT AND INFESTATION CONTROL

For the first part of the year a private company was engaged on a day to day contract basis, at this time only complaints were being dealth with. In August the Council appointed a full-time Rodent Operator and after his initial training, survey work and sewer treatments were undertaken. Special attention was also given to the Council's refuse tip along the Ham Road as a series of complaints had been received from this area.

REPORT ON OFFENSIVE TRADES FOR 1971

During the year the two offensive trade factories continued to operate, receiving butchers and slaughterhouse waste fat and bone and processing material into tallow and pig meal. The third factory cocking hoof and horn for fertilizer compounds ceased operating during the year and it is anticipated that it will be closed permanently.

During 1971, 121 complaints were received in the Public Health Department from residents of Faversham and Oare, referring to 55 particular days. Once again it must be emphasised that a nuisance will only arise if the raw material being cooked is in a decomposing state. With fresh material any resulting odour is a "clean" cooked meat smell even if a breakdown of equipment occurs.

Faversham Animal Products Ltd.

This factory, which operates on a small scale, continued under the control of the Manager who shows a sense of responsibility to the public at large by running the factory in such a way to cause the minimum of nuisance.

In August, while the Manager was on holiday, a nuisance was caused by defective equipment and bad material. The Company was prosecuted and entered a plea of guilty. The fine for this first offence was £10.

J. & E. Tate

January - In reply to an enquiry from the Town Clerk the Company wrote to say that certain cutstanding works had been completed and they had appointed one of their existing employees (Mr. Davies) to be Manager in place of Mr. Moore who only stayed with the Company for three months during 1970.

March - On the 22nd the factory was found to be operating with an open condenser and very little water supply to the cooling tower, also there was difficulty over blocked drains caused by overspill from fat tank. Mr. B. Tate was called to the site by telephone and on his arrival closed the factory down until the faults were cleared.

April - Nuisance arose from the burning of rubbish on the site - arranged with the Borough Surveyor to accept waste material at Council's tip subject to production of tipping ticket. Very little use has been made of this arrangement.

On the 20th Mr. J. Tate's attention was drawn to the number of complaints being received and also to the loss of efficiency of his condenser unit (low throughput of water).

On the 21st following further complaints and inspections the Company was prosecuted for Bydaw Cffences. The Company pleaded guilty and were fined £20.

At a special meeting of the Council on the 27th a number of resolutions were made to enable quick action to be taken in respect of any nuisance arising from the offensive trade factories.

May - The Company was again prosecuted for aByelaw Offence on the 11th - fined £20. As the material was in such a poor condition and the equipment was defective on this particular day the Company was also requested to cease operations. A letter addressed to the Mayor dated the 12th stated that stock to the value of £2,000 had been disposed of following this shut down. On the 19th, following complaints, an inspection of the site was made and quantities of raw material and a vehicle loaded with rotten material in it was found. A Statutory Notice requiring the Company to abate this nuisance was served with a time limit of 43 hours. A large hole was bulldozed on the site and the material buried.

June - A further warning letter was sent to the firm stressing that the condensing apparatus should be kept working at its maximum efficiency.

July - On the 10th the factory was inspected following complaints and it was found that an offence against the Byelaws was being committed. The Company was subsequently prosecuted resulting in a £20 fine with £10 costs.

August - During an inspection on the 24th following the receipt of complaints, a lorry load of rotting raw material was found on the site sunk up to its axle in soft ground. Mr. J. Tate was told to move the lorry without delay.

October - During the week commencing the 25th general conditions at the factory were very bad. As a result a Statutory Notice was served on the Company giving seven days in which to clean up the site and information was laid in respect of a number of Byelaw Offences. The summons were withdrawn following the rapid response of the Company in carrying out repairs. A letter was received from the Company detailing arrangements which had been made to comply with the Statutory Notice.

December - The factory was inspected on the 29th following complaints. Two trailer leads of raw material were on site and considerable quantities lay on the cooker leading floor. All the raw material contained substantial quantities of turkey trimmings and gut which was in a putrefying condition. One trailer had collapsed because of excess weight and part of the side had been ripped off to give a circulation of air. A sour smell was arising from the raw material which was giving rise to the complaints. Mr. B. Tate explained that the high turkey gut centent was a character of raw material which had to be accepted in the trade at Christmas time. Other aspects of the factory operation were far from satisfactory, i.e. circulation of cooling water, drainage intercepter traps full and the burning of waste packing material.

On the 30th considerable improvement in conditions had been effected and only a small quantity of turkey gut remained.

7th January, 1972.
